

ORAGO[®] Costing & Controlling 3.0

Software for successful product cost management

ORAGO CC 3.0 Software-Suite supports the product cost management of manufacturing companies over the entire product lifecycle, from quotation costing to calculation during development and profitability analysis.

With ORAGO CC 3.0, manual effort can be reduced and product costs and profits can be sustainably optimized. ORAGO CC 3.0 software is characterized by its intuitive user interface, simple IT requirements and attractive price-performance ratio.

Benefits

■ Gain transparency on product costs

ORAGO CC 3.0 enables you to calculate product costs and prices with the greatest possible transparency and accuracy, both in customer and supplier negotiations.

■ Save time and eliminate possible sources of error

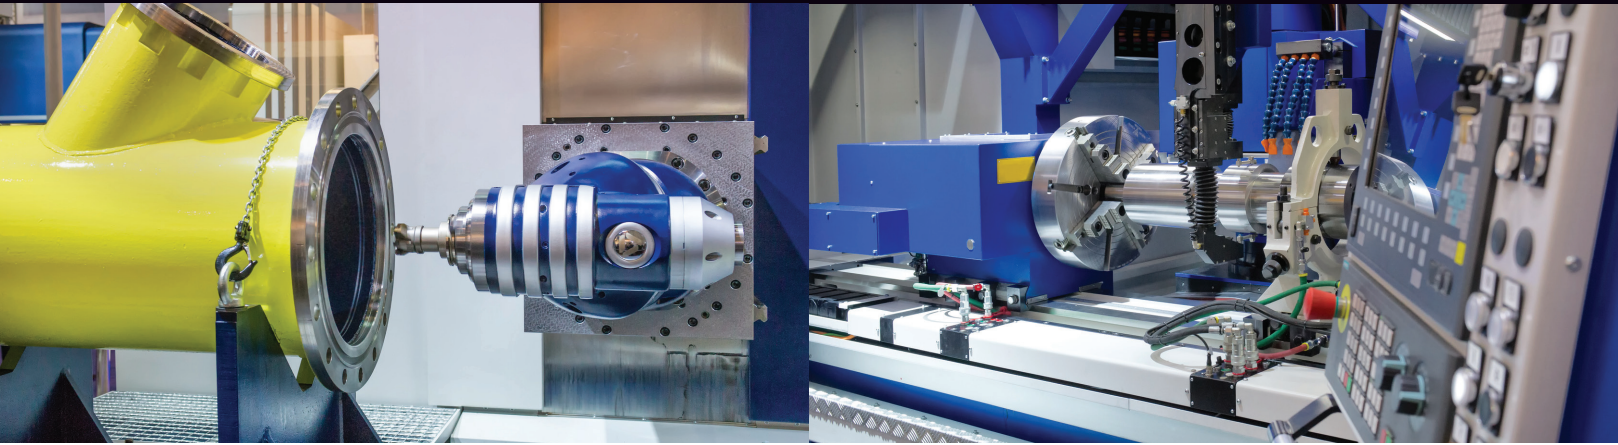

Reliably and comprehensively answer customer inquiries under time pressure. Provide ad hoc analysis for when decisions need to be made in a timely manner. ORAGO CC 3.0 offers standardized automatic processes and at the same time ensures high flexibility in operations.

■ Identify potentials for increasing profitability

ORAGO CC 3.0 allows you to allocate overhead costs to individual cost units in line with the principle of causation, despite increased complexity of production and business processes. Cost drivers and profit potentials can be reliably identified.

■ Increase your competitiveness and profits

As a result, ORAGO CC 3.0 increases your competitiveness and profits. In order to ensure your success in the long term, we will support you with consulting and special services.

Functions

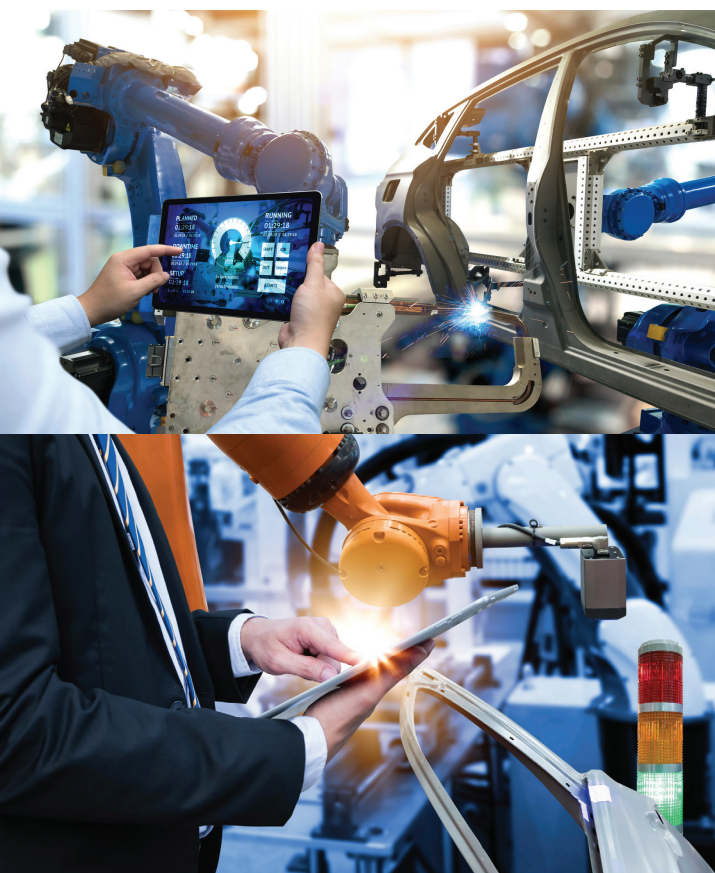

- Flexible planned cost accounting
- Full and partial cost accounting
- Marginal costing
- Cost center accounting
- Operating statement
- Machine hour rate calculation
- Activity based costing
- Process cost calculation
- Cost unit accounting
- Income statement
- Contribution margin accounting
- Cost comparison calculation
- Profitability calculation
- Dynamic investment calculation
- Performance measurement systems
- Business intelligence
- Automatic reporting
- Automatic filling of CBDs

Fields of application

- Quotation costing
- Calculation during development
- Re-calculation
- Cost and revenue planning
- Product life cycle calculation
- Cost driver analysis
- Purchase price analysis
- Cost engineering
- Investment decisions
- Target costing
- Benchmark costing

Sectors

- Automotive
- Machinery and mechanical engineering
- Aerospace

About ORAGO GmbH

ORAGO GmbH was founded in 2010 based in Duesseldorf, Germany. The company focuses on software development and management consulting for product cost management and controlling.

We are specialized in implementing planning and control systems for market-oriented corporate management. The focus of our services is on identification and elimination of costs and values that generate little or no customer benefit.

As a result, we generate reduced procurement costs, increased productivity and higher profits.
